Afk arena best wilder heroes 2020

This Tier List Arena AFK gives players a rough idea of the best heroes you need to focus on at different stages of the game: early, middle, and endgame. Hero ratings for different game modes are also included: PvP, PvE, Arcane Maze, and Boss Guild.If you are new to the game, check out the Hero Priority Guide to see which heroes you need to focus on first! Let's go straight to our character list for now. Be sure to read the comment at the end of this article for more ideas. Last Updated: Patch 1.55 (January 12, 2021)AFK Arena Tier List for late play (Lvl. 161 – 240)In this mode of the game, legendary heroes will not receive any further skill upgrades, they will fall in power, losing viability. Late Game Arena AFK is now more evolved around the miathian heroes.Fodder (late game): It's safe to sacrifice these heroes immediately for upgrading the others. Play AFK Arena on PC/Mac and enjoy the game anytime! Aik Arena Early Game Layer List (Level 1 – 60)Aik Arena Early Game Tier List ranks heroes based on their abilities to finish early games efficiently and efficiently. They're usually the heroes who can carry their teams with the least investment possible. In the early stage of the game, it is recommended to use either as your main reason while slowly damon, or Saurus because they will carry your main cheat in the middle for a very late game. Choose Azi from the Challenger store and use lab coins for Arthur, except when a dimensional ex-change continues. More details here! AFK Arena Tier List for mid-game (level 61 – 160)The middle game starts from level 61 because that's where legendary heroes get their ultimate lv.2 and diehard heroes get their fourth skill, making them much more viable than the early game. This is a huge level of achievement for all the heroes at AAFK Arena. This is where real fights start. Aik Arena endgame Tier List At this stage of the game, all 5* of your ascent heroes should be in lv. 240+ with full mil equipment + signature items! Fodder (late game) Now it's perfectly safe to sacrifice these heroes immediately!NotesCharacter ratingTierDescriptionS +literally over-activated. They have the amazing abilities that can easily change the outcome of the game. S are the strongest heroes who have the game changing abilities when they are in the right teams. These are very good heroes and own solid utilities and game-changing qualities. B Great heroes that provide decent abilities and game-changing qualities. CAverage heroes who have some decent utilities but lack game-changing qualities. Wholesale heroes who don't have toilets. Or you have to make a huge investment for them to work. Only certain groups can be used. FTypically useless heroes in most team compositions. It's best not to use them in most cases. Layer list sections include: A global layer list that works as a result of an overview of the power and benefit of the heroes within a certain level range. PvP: A more specific layer list on heroes best suited for A specific list of layers about heroes most used for the campaign and the King's Tower. Lab (Maze & Peaks of Time): A list of level specific to heroes who are best suited for the mysterious labyrinth and peaks of state time. Hunting Team: Tierlist where heroes are best to bring against hunting team Bosses Level 1-160: Saveas, Mirael, Tasi, Brutus, Lucius, Elijah & Lailah, Nemora, Solise.Level 161-240: Retention, Athelia, Elijah and Lila, Brutus, Lucius, Nemora, Dimon, Laika.Level 240+: Telen, Rowan, Elijah and Lila, Isolde, Dimon, Tassie, Tessie, Tigress, Roslin, Azij, Quick, Khzard, Leica, Arthur, Atalia, Einez. End game PVE & PVP Tier List by ShizzamFirstly, this is my personal opinion. Each player has his own game so what's great for me might just be fine for you so please take this, and each hero layer list, with a pinch of salt. I categorized the heroes into these parts and sections and provided a brief rationale. Note that many heroes fill more than one role. PvE HeroesPress + button to see more details and take off best. Immortal. Great damage if supported. Insyf at every level of ascension. Damage based on enemy HP so incredibly scaly even in low ascension. Regen excellent energy and independent. The damage has an opportunity to ignore the enemy's defense. He has control with suction and ult. Very good base stats with high HP regen, CC immunity and great signature item to amateur allies. Arguably the best tank in the game with a great healer, energy regen for the team and stunning. Best amateurs in the game. Very good damage, amateur and very strong control. very good scales with enemy level. Arguably the best whispering in the game. Can lock in the healing enemy and energy easily. Raw damage statistics are staggering. So powerful that it can rock enemies in its ultimate A.V.L. deficits, could wipe out enemy teams with an 80+ LVL deficit. Big damage and he can rock. Very good to cure cc.Very good amateurs and damage that scales with enemy HP. Teleport allows her to tank to some extent, arguably the best CC in the game. An amazing energy regen who continues his death, great at denying enemy utili. With solid tank signature item: 4 x new death cheat. A very powerful damage dealer. too. Solid damage, self-existence and a big lockdown of one target. Very good base statistics with high HP regen, CC immunity and good control. Great haste and buff damage and with furniture, strong damage dealer. Very good damage to AoE, enemy debuffs and strong control. Duff AoE is very good that can interfere with spells and attacks. Once overcome, very good immunity of HP Regen and CC immunity, very strong damage and healing. The only problem is exposed to rulings. Good damage, such a unique game so good in niche situations. Great damage debuff and can increase rapidly during battle. The best capabilities rank with enemy damage. However, reprisals are difficult. He drops out of the game, but he still has good defensive abilities and is recovering. Locking and large one-purpose furniture Raw damage capabilities are strong, the problem is he needs team support while stealing protection from his teammates. Very powerful self to sustain a piece of furniture. PvP HeroesPress + Button to see more details and the strongest burst hero for pvp, amazing furniture capabilities and Heroes scale with enemy health to perform less well pvp. Easily distracted heroes (including Mehira) are too easily put up locationneed to be able to take some damage, some heroes are too squashed in its signature item and rapid attack speed can lock enemies to a similar level, - making it a very powerful pvp damage dealer. But her abilities don't function in the high-level deficits typical of the campaign. Another game-ending list of AFK ArenaFor Campaigns & King's Tower | Shared by Idle_Jasper_Here are actually the best heroes for the endgame at AFK Arena right now. I don't really want to put a specific level list with S, A, B, C tier, etc. for this section so I will put the characters into 3 generic categories. Play AFK Arena on PC/Mac and fully enjoy the game! The endgame list of the optimistic layer campaign: safe & great heroes to invest in. They shine well in the late game, even in the highest episodes of AFK Arena.Situational Tier: A little less important. You can replace them with the above heroes in certain specific situations. They're very important in certain ensembles. Subpar Layer: The worst heroes to invest in. Always take the AFK Arena layer list with a grain of salt. You don't have to follow everything I mention in this guide and always remember that team synergy is a priority in building the team. In general, you want to build a team that evolves around one primary carry (the one that delivers the main damage output). The team should have 2 tanks (which have high protection and HP) and support heroes (who provide amateurs, debuffs, healing effects, crowd control effects, etc.). All the others help the main hero stay and deal with as much damage as possible. Optimal list of heroesThe hiroma network services HeroesFral, Thorne, Nartasy, Laika, Nemura, Ironlosius, Rowan, Belinda, Fox brutalitythelia (+30 or higher signature item), Fast, Twins.Garjol, Dress, Calthorolmus, Gorbo, Castration, Caz, Lorsenosiin, Hendrick, Estrilda Hessus, Wark, Wark, Scrug Ortus, Azzabella, Badantan, Rennomisu, AntanderStranaSatrana Zolratifis General Save: Why she's not an optimal heroine, she's one of the best heroines early on She's starting to shine from A.V.L. 161 when she unlocks her most important skill here. During this time, you can invest your resources and get her 40 levels higher than other heroes while still being able to provide decent support to her through lower level support. She's free-to-play-friendly and is the easiest president to invest in: you can get 2 copies of Free Save, one from Divine Kingdom and one finishing chapter 15. You can also get it from the maze shop.Once your crystal is above level 240, you can start That it's becoming less effective. Now she dies faster and usually before ultimate casting. After level 240, most players use the guild hunt and the specific king tower only. That's why I don't put her on AFK Arena's optimal hero list.Triple Wilders ComboShemira + Green Trio (Lyca, Nemora, Tasi) + Lucius/Brutus/Grezhul is one of the most common teams in the game, especially for campaign and king tower.Usually, after level 240, people tend to replace guarding with Ferael.The green trio is still very amazing for campaigns. And of course, I strongly recommend building Lyca, Nemora & Tasi your first tree in Wilder Heroes. Then, you can work on Eironn or Caz as a tank for Wilder Tower. Arden's great in the early game. He shines after level 141. However, since he is capped at level 160, he will not be so effective in the past chapter 22/23.Lorsan is not used much at current headquarters. However, it is great for the guild hunt and some specific campaigns. Pharrel, one of the best currys at AFK Arena!snt the best. Paral should be one of the best situations on afk arena.He's layer list to have crazy high damage, shock. It can summon winds that reduce enemy energy and interfere with attacks, yes, he's so great. In addition, it can survive very well by dodging attacks. Not to mention his signature item is one of the best right now. Farrell starts shining after level 200. And you can really feel the difference after level 240.Get as many copies of Paral as possible. Never use it as food. Lightbearer TeamNowadays, using Lightbearers in the campaign becomes more sustainable with the release of the new Lightbearer Heroes.If you don't use a full Lightbearer team, you want to focus on either Rowan or Lucius at first. The group faction bonus is what makes the full Lightbearer team (or heavenly – Lightbearer) super strong now. You can activate Ita as the main topic as long as its signature item is lv 30+ (to ensure it has enough damage). Mauler TeamMaulers are probably the worst faction for campaign & king tower.The only exception is Brutus. Due to recent ability to hinge, he is able to deal with enemies that are much stronger than him. Hessus and Sapia are two honorable mentions. They're very good in some specific episodes. But they're still not enough to be called Heroes.Example Lineups here are some great examples of the vehicles carefully tested by a lot of top players. Play AFK Arena on PC/Mac and fully enjoy the game! Brutus + Tassie + Nemora + Ferael + Lyca This should be the best team for F2P and low spenders players at AFK Arena to play in an endgame game. It's one of the most popular endgame teams right now. As a free agent, it's entirely possible to get to Chapter 25 through this crazy strong group. It's ok to replace Brutus with Grezhul, Nara or Thoran.Lucius + Estrilda + Rowan + Fox + Belinda Estrilde can be replaced with Hendrick or Roslyn. Fox can be used as the best team. You Use heavenly heroes on this team, too, as long as they have high-level signature items. If you want to use a full Lightbearer team, you usually need to swap heroes depending on the situation. It's not a free faction to be tortured. Mast + Nara + Paral These teams 3 are great base heroes for many campaign teams. You can add any hero from the mentioned green tier, Eironn, Athelia or Brutus depending on the enemies. If you have any questions or suggestions, feel free to comment below to help us improve the AFK Arena layer list. I love you guys. Guys!
